#### **PETERSBURG/WRANGELL HERRING UPDATE #15**

The department conducted an aerial survey today, May 6, of the Hobart Bay/Port Houghton area between 7:00 a.m. and 9:00 a.m. The survey conditions were good with partly cloudy skies and winds between 5 and 15 mph.

#### Hobart Bay/Port Houghton

No schools or active herring spawn were observed during today's aerial survey. The number of marine mammals has remained static for the past few days. The majority of active spawn occurred on Friday, May 3, around the entrance to the Sanctuary. To date, 1.25 nm of shoreline received herring spawn. The next aerial survey has not been scheduled at the time of this update. The R/V Kestrel will be conducting a spawn deposition survey this week. Forecasts of mature spawning biomass for the 2013/2014 season will not be finalized until late this fall.

#### 2013 Survey Herring Summary

#### Hobart Bay/Port Houghton

April 16	No herring activity, 71 sea lions, 2 whales, 100 scoters.
April 19	No herring activity, 102 sea lions, 550 scoters.
